

FOREIGN EXPOSURE PROGRAM

WHAT IS FEP ?

The Foreign Exposure Program, initiated by IITK students, aims to provide international exposure and strengthen the institute's global partnerships. This web application facilitates seamless communication between students and international professors, streamlining opportunities for collaboration and fostering meaningful global connections.

MOTIVATION

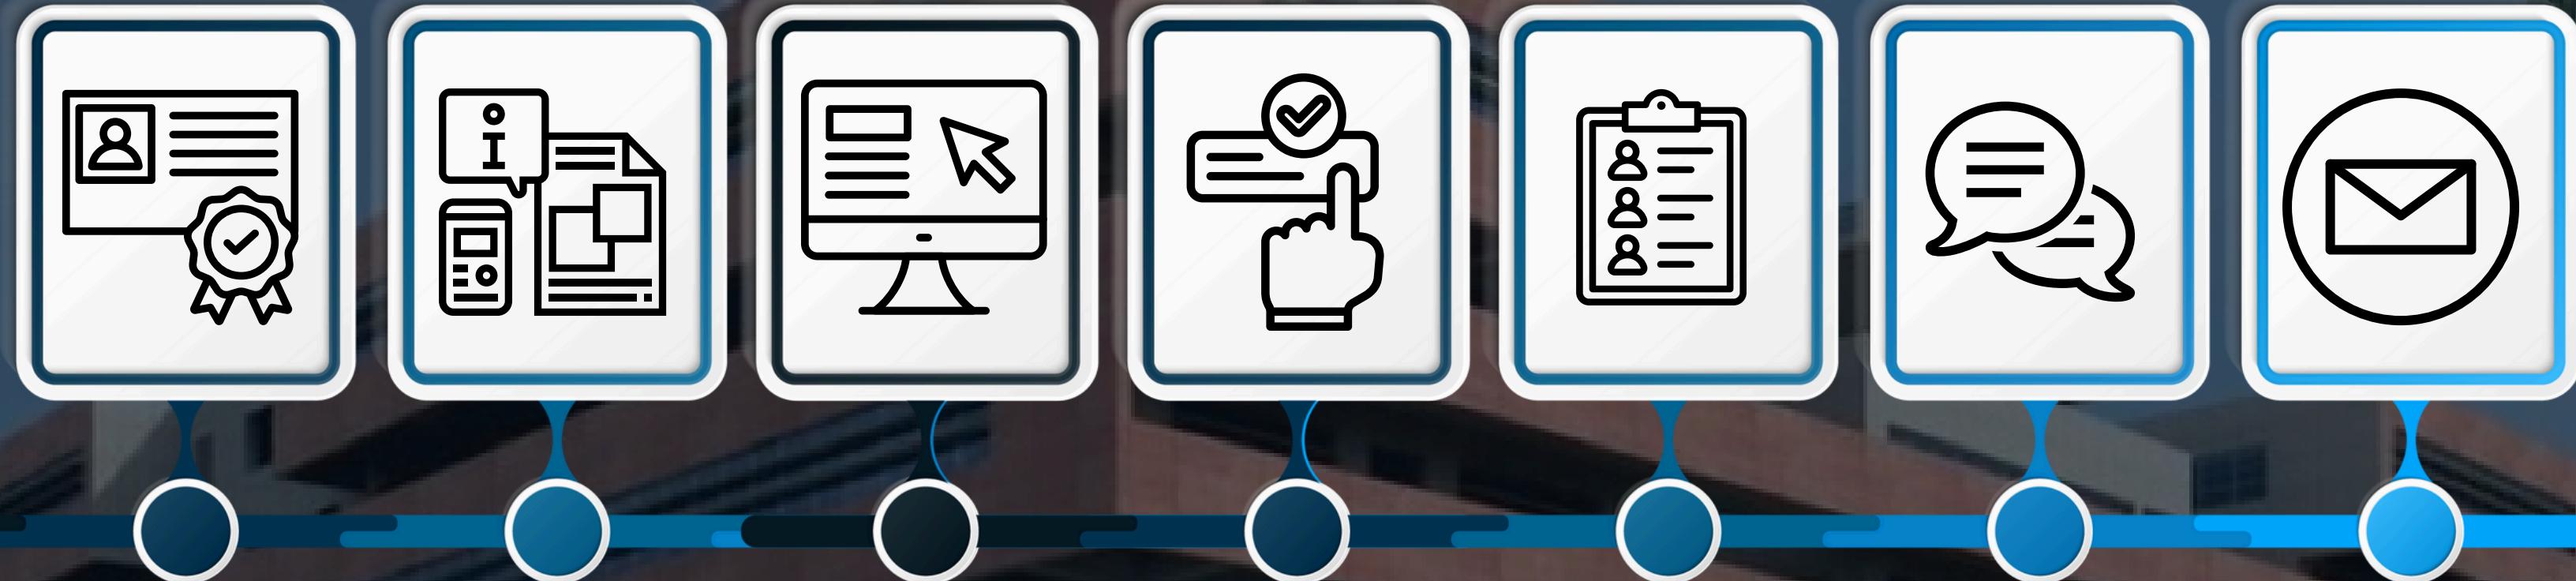

- **One-Stop for Global Research Simplifying Internship Applications:** Eliminates the need for cold mailing by offering global research internships through a single platform.
- **Maximizing Summer Productivity Unlock Global Opportunities:** Helps students make the most of their summer by accessing international internships and experiences.
- **Boosting Global Exposure Elevating IITK Undergraduates:** Enhances international opportunities, helping IITK undergraduates compete with peers at other leading institutes.

How FEP Differs from MoU based internships

- MoU internships focus on broader institutional goals like research and faculty exchange .FEP is student-focused, offering tailored, holistic experiences for academic, cultural, and professional development.
- MoU internships are limited to specific institutions. FEP offers structured, accessible opportunities for students across all departments.
- MoUs may limit positions based on partner capacity : FEP offers more frequent, short-term opportunities, allowing students to find experiences during vacations or breaks.
- FEP can involve a broader network of international institutions, allowing students to explore diverse fields.

PROCEDURE

Credentials will be sent to interested professors.

Professors will send details of their projects including area of work, prerequisites, etc.

These projects will be uploaded to the portal.

Registered students will apply for the projects as per their preferences.

Professors may shortlist students based on the documents submitted by them. The list will be uploaded on the portal.

Further communication can take place between students and faculty for additional screening .

The selected students are allowed to contact the faculty and proceed accordingly.

Opportunities for Students

- **International Internships:** Gain valuable experience in international organizations and companies, building their global network.
- **Expand Network:** Students can build connections with international professors and peers, expanding their professional and academic networks.
- **Research Collaborations:** Embrace the power of collaboration, and make your mark on the world stage

BENEFITS TO PROFESSORS

- Engaging with students from academic backgrounds can inspire new research ideas and perspectives
- Being involved in global initiatives can elevate a professor's standing within their institution and the wider academic community, leading to awards and accolades.
- Interacting with students from various backgrounds allows professors to incorporate diverse perspectives into their curriculum, enriching discussions and critical thinking.

DEPARTMENTS AT IITK

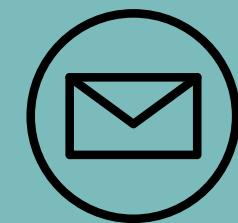

Bachelor of Technology

- Aerospace Engineering
- Biological Sciences & Bioengineering
- Chemical Engineering
- Civil Engineering
- Computer Science & Engineering
- Electrical Engineering
- Materials Science & Engineering
- Mechanical Engineering

Bachelor of Sciences

- Chemistry
- Mathematics & Statistics
- Physics
- Earth Sciences
- Economic Sciences
